Customized Tutoring Services Provides Results Within Weeks

Creative Tutors 4 Kids, PROVIDES TEACHERS TO MEET INDIVIDUAL STUDENT AND FAMILY NEEDS

PLANO, Texas -- Newly formed Creative Tutors 4 Kids, is the first company to provide customized tutoring services to Dallas-Ft. Worth area students and their families. Offering a comprehensive tutorial plan for students from preschool through high school, Creative Learning's team of education experts works with students in their home to produce results almost immediately.

Company president and CEO, Jan Van Blarcum, Ph.D., says that Creative Tutors 4 Kids, is unique in its approach. "Most tutoring programs do a good job of meeting general needs, not necessarily considering individual needs," stated Dr. Van Blarcum. "We offer a thorough evaluation of each student and his family's needs, then match the ideal tutor for that particular student and his family, so that the students truly get an action-packed teaching session for quick results."

"When a student sees improvement in his classroom performance, it enhances his self-esteem," Dr. Van Blarcum continued. "Our goal is to create a solid educational foundation for the student's future, in the fastest and most effective way possible."

Another facet unique to the Company is its in-home tutoring. Because students are in their own environment, they experience less adjustment time, making their sessions more productive. Also, at the end of each

session, the tutors provide a brief closing time with the parents. During that time, tutors discuss the student's progress and potential, so parents immediately know the program's success.

According to Dr. Van Blarcum, Creative Tutors 4 Kids, is also distinctive for its program evaluation and development. The Company's expert staff not only will review the referral from an individual student's teacher, but also, if needed, will visit the classroom to assess student skills not addressed in the referral. The Creative Learning educational team makes itself available to the students entire educational environment by meeting with the parents, classroom teachers, principal, counselor and with any professionals involved. In doing so, Creative Learning provides a total comprehensive educational experience which helps define additional areas of growth.

From there, the Creative Learning educational team can develop a tutoring program especially designed for that student. Throughout the tutoring process, the tutor and other Creative Tutors 4 Kids, experts will make alterations to the student's program, as needed. With this custom approach, the student receives optimum instruction that produces quick results.

Creative Tutors 4 Kids, provides personalized curriculum instruction to students of all academic abilities and in all subject areas. The Company Creative Tutors 4 Kids, offers tutoring seven days a week, with flexible hours for parents' convenience. It is a small business, located in Plano, Texas.

All Creative Tutors 4 Kids, tutors are professional educators, licensed and degreed to teach students of all ages. Each tutor undergoes an extensive background check prior to joining the Company.
